

DISCOVER THE EXPERIENCE CENTER

Test new products and materials without interrupting operations and compare state-of-the-art particle foam systems and the latest machine generations with existing systems. Optimize your machines and expand your expertise in process and energy management.

Visit us and discover how we can realize your projects safely and efficiently!

EXPERIENCE
CENTER

Advantages of using the Experience Center

1

PROCESS OPTIMIZATION WITH SAVINGS POTENTIAL

Testing how changes to individual process parameters affect the end product, cycle times and energy consumptions.

2

EXTENDING HORIZONS

Production of new parts and prototypes as well as pilot series production.

3

TESTING NEW MATERIALS

Trying out and testing new materials in existing or custom-made molds.

4

PRODUCTION SUPPORT

Pre-foaming of various particle foams (e.g. EPP/EPE/ EPS/E-TPU) as well as pressure loading and intermediate storage of these materials.

5

NEW FUNCTIONS

Testing of various special functions of the systems and their effects on quality and cycle times.

6

PROCESS DATA RECORDING

Demonstration of our energy measuring system for steam, water and air consumption with complete recording of all process data.
